Activate More Grip with the **Whiteline KDT922 Positive Traction Kit** consisting of 8 high performance synthetic elastomer bushing inserts that easily install above and below the voids of the rear factory subframe (crossmember) bushings. **Proven to benefit traction (minimize axle tramp) on launch, the KDT922 also dramatically reduces rear cross member misalignment & movement which allows a more positive and predictable feeling from the rear end during cornering.**

KDT926 | POSITIVE SHIFT KIT

See it for yourself
www.youtube.com/whitelineflatout

KDT926 Positive Shift Kit is another bang for your buck modification from Whiteline. A simple and very effective bushing that inserts into the factory gearbox mount and results in a greatly **improved shift feel and response** by reducing the compliance of the heavily voided factory mount.
