WALK your Mk5

WALK - WHITELINE ANTI LIFT KIT

From the creators of the original anti lift and caster kit for WRX's comes the latest addition to the programme with the release of the WALK for VW Golf MK5.

Benefits of a WALK fitted to your Mk5:

- Revised Anti-Lift geometry for extra grip and reduced understeer.
- Static Caster angle increased by 0.5 degree.
- Low compliance polyurethane bush for minimum dynamic caster loss and positive steering feel.
- Built-in axial grooves for comfort.
- Low rotational resistance.
- High strength anodised aluminium mounts.

KCA316

Robust
aluminium mounts

Low compliance
Polyurethane
Bushings

The pin on the end of the control arm is of a hex profile, so fitting a bush with a hexagonal hole provides a lot of rotational resistance. By fitting a polyurethane intermediate bush with a round external profile, maximise resistance whilst maintaining ride quality

ALSO AVAILABLE FOR THE VW Golf Mk5 Gti
BWF19XZ - Front 24mm blade adjustable sway bar
BWR20XZ - Rear 24mm blade adjustable sway bar

Developed, tested and proven on the track
